DETAILED ACTION

Specification

1. The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.
2. The specification is objected to because reference character "28" has been used to designate both the IC and the vehicle wheel. Correction is required.

Drawings

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference signs mentioned in the description: 28 (Vehicle wheel), 10', 12', 18', and 24'. Correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who

08756458-010901

Art Unit: 2875

has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

5. Claims 1-13, 16-21, and 24-32 are rejected under 35 U.S.C. 102(e) as being anticipated by Duke et al. [6,070,997].

Duke discloses a light for connection to an air valve stem [2] comprising a connector, a power source [24, 25], an LED light source [16] and a motion sensitive switch. All diodes emit colored (including white) light. The light is described as waterproof [column 1, line 66].

Allowable Subject Matter

6. Claims 14, 15, 22 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note Jamieson (2,708,712).
